## Frontend Developer (Entry-Level)

I'm a self-taught frontend developer in progress, currently building projects using HTML, CSS, JavaScript and React. Before transitioning into tech, I worked as a program associate and content creator in the development and training sector. I now apply those analytical and research skills to build clean, responsive, and user-friendly interfaces with strong attention to detail.

---

## TECHNICAL SKILLS

**Languages & Certifications:** [JavaScript \(ES6+\)](#), [HTML5](#), [CSS3](#)

**Tools:** Git & [GitHub](#), VS Code, Chrome DevTools

**Web Development:** Responsive UI, DOM Manipulation, API usage, Web Design

**Other:** SEO content writing, presentation design, Canva designs, project coordination, digital strategy.

---

## PROJECT EXAMPLES

- **Responsive Portfolio Website:** [Live Demo](#) , [Code](#)  
Built a fully responsive portfolio with dark/light mode, animations, project cards, and mobile-friendly navigation.
- **Weather App:** [Live Demo](#), [Code](#)  
Fetches real-time weather data using a public API and displays it in a clean UI.
- **To-Do List App:** [Live Demo](#), [Code](#)  
Implemented add/delete functionality, local storage persistence, and dynamic DOM updates.
- **Quiz-App:** [Live Demo](#), [Code](#)  
Built a clean and interactive quiz app featuring multiple-choice questions, instant feedback, and score tracking.
- **Random Password Generator App:** [Live Demo](#), [Code](#)  
It generates a secure password with one click and allows easy copying to the clipboard.
- **Notes Taker App:** [Live Demo](#), [Code](#)  
Allows users to create, edit, delete, and save notes directly in the browser using local storage.

- **Simple Calculator App:** [Live Demo](#), [Code](#)  
Performs basic arithmetic operations with a clean interface and input validation.
  - **Age Calculator App:** [Live Demo](#), [Code](#)  
Calculates a user's exact age in years, months, and days based on the selected birth date.
  - **QR Code Generator App:** [Live Demo](#), [Code](#)  
Converts text or URLs into a QR code instantly using an external QR API.
  - **Stopwatch:** [Live Demo](#), [Code](#)  
Simple and user-friendly stopwatch that allows users to start, stop, and reset time with precision.
-
